## Filosofia | Philosophy | Philosophie

Quest'anno MLE compie 30 anni. Guardando indietro si può facilmente capire che la chiave di questo successo di marchio è il metodo di lavoro e la forte specializzazione. La stretta collaborazione con gli Interior Designers specializzati in alberghi di lusso ha permesso di capire quali erano le esigenze dei nostri comuni clienti e la nostra cultura illuminotecnica ci ha permesso di rispondere a questi bisogni con prodotti innovativi, funzionali e soprattutto di gran gusto. Un paio di esempi.

Nel 1986, quando la tecnologia delle lampadine mette a disposizione le lampade alogene miniaturizzate a bassa potenza, MLE ha sviluppato la prima lampada da lettura con braccio orientabile. Il nuovo apparecchio fa luce e può essere orientato senza scottarsi. In casa MLE nasce quindi un nuovo concetto d'illuminazione che viene poi successivamente sviluppato con l'introduzione dei LED da L.Bellini (Opera, 2003).

Nel 1988 viene lanciata Carlton, con PY Rochon. La prima lampada da bagno con grado di protezione dall'acqua IP44. Solo successivamente i legislatori europei si accorgono che nelle zone umide è necessario proteggere il cliente dell'albergo e quindi emanano regolamenti in materia.

La specializzazione di MLE è una specializzazione di mercato. Specializzarsi in un mercato significa focalizzarsi sui bisogni di un certo tipo di clienti e sforzarsi di rispondere con propria cultura aziendale. Per capire a fondo le varie sfaccettature del mercato dell'hotellerie MLE dialoga e collabora con gli Interior Designer specializzati, con le catene alberghiere, con gli Investitori e con gli Operatori. Ciascuna di queste figure infatti è coinvolta nel progetto e nella gestione di un albergo ed ha le proprie necessità che MLE sintetizza nella propria collezione.

MLE this year celebrates its 30th anniversary. Looking back one can easily understand that the key to the success of the brand is the working method and the strong specialization. Working closely with luxury hotel Interior Designers has allowed us to understand which were the needs of our common customers. Our culture of lighting allowed us to respond to these needs with innovative, functional and, above all, beautiful products. A couple of examples.

In 1986, when the lamp technology provides us with the miniaturized low-power halogen lamps, MLE develops the first reading lamp with adjustable arm. The new device makes light and can be oriented without burning. MLE arises then a new concept of illumination which is then subsequently developed with the introduction of the LEDs together with L.Bellini (Opera, 2003).

In 1988 MLE launched Carlton, with PY Rochon. The first bathroom lamp with degree of protection from water IP44. Only later the European legislators did realize that in wet areas is necessary to protect the client of the hotel and then enact regulations.

The specialization of the MLE is a market specialization. Market specialization means to focus on the needs of all the actors involved in the project and in the management of the hotel. The answers to these needs have to be included into the product range thanks to a well based Company Culture.

MLE célèbre cette année son 30e anniversaire. En regardant en arrière, on peut facilement comprendre que la clé de la réussite de la marque est la méthode de travail et la forte spécialisation. Travaillant en étroite collaboration avec les Architectes d'Intérieur d'hôtels de luxe cela nous a permis de comprendre quels étaient les besoins réels de nos clients communs. Notre culture de l'éclairage nous a aidé à répondre à leurs besoins avec une certaine innovation, fonctionnalité et surtout avec de beaux produits. Quelques exemples.

En 1986, lorsque la technologie des sources nous fournit les lampes halogènes de faible puissance miniaturisés, MLE a développé la première lampe de lecture avec un bras réglable. Le nouveau dispositif génère la lumière nécessaire et peut être orientée sans brûler. MLE se lance alors dans un innovant concept d'éclairage qui sera ensuite développée avec l'introduction des LED avec L.Bellini (Opera, 2003).

En 1988, MLE lance la Carlton, avec P.Y. Rochon. La première lampe pour la salle de bain avec un degré de protection contre l'eau IP44. Ce n'est que plus tard que les normes européennes imposent l'IP44 dans les zones humides car nécessaire pour protéger les clients des hôtels.

La spécialisation de MLE est de s'adapter au marché. Cela signifie se concentrer sur les besoins de tous les acteurs impliqués dans le projet et dans la gestion de l'hôtel. Ces critères doivent être inclus dans la production et la mise au point permanente de la gamme de produits grâce à une forte culture de l'entreprise.

*Il made in Tuscany | Made in Tuscany | Fabriqué en Toscane*

Pur essendo un'azienda internazionale, MLE è radicata fortemente sul territorio fiorentino e toscano. La Toscana è una terra con una forte cultura del prodotto di qualità e della manifattura e da sempre esprime eccellenze in molti i settori legati al lusso, all'arte e all'artigianato. Durante la sua attività MLE ha potuto selezionare i migliori fornitori delle diverse fasi di lavorazione che il prodotto attraversa e il 90% di questi sono in Toscana. Oggi più che mai MLE è impegnata a trasferire queste eccellenze toscane nella propria collezione.

Despite being an international company, MLE is strongly rooted in the territory of Florence and in Tuscany. Tuscany is a land with a strong culture of high quality product and with many manufacturing excellences which, since centuries, express themselves in many areas related to luxury, art and crafts. During its activity MLE selected the best suppliers of the various processing stages that the product crosses. 90% of these are in Tuscany. Today more than ever MLE is committed to transfer these Tuscan excellences in its collection.

En dépit d'être une entreprise internationale, MLE est fortement ancrée dans le territoire de Florence et en Toscane. La Toscane est une terre avec une forte culture de produits de haute qualité avec une excellence de fabrication qui, depuis des siècles, s'exprime dans de nombreux domaines liés au luxe, à l'art et à l'artisanat. Au cours de son activité MLE a fait appel aux meilleurs fournisseurs pour les différentes étapes de traitement que le produit traverse. 90% d'entre eux sont en Toscane. Aujourd'hui plus que jamais MLE s'engage à transférer cette excellence toscane dans sa collection.

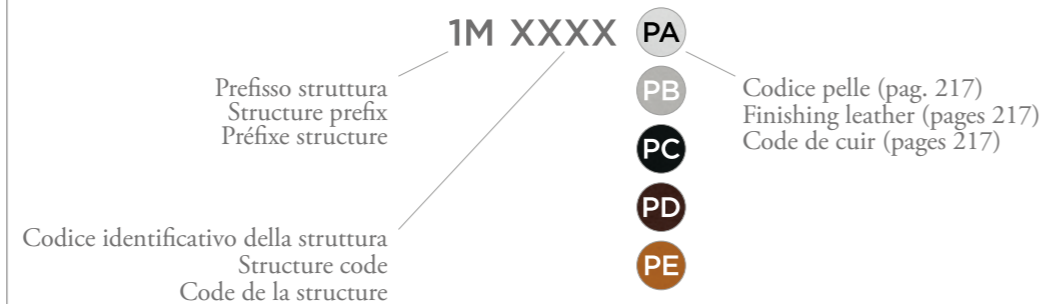

## Pelle | Leather | Cuir

Nascono nella seconda metà del 1800 le prime imprese del distretto toscano della pelletteria. Uno dei pionieri era Guccio Gucci che negli anni Venti decide di aprire un laboratorio specializzato nella pelletteria, articoli da viaggio e da selleria, insieme a un negozio a Firenze. Le lavorazioni si mantengono su scala prettamente artigianale. Si eseguono all'interno dei laboratori tutte le fasi del processo produttivo, realizzando un prodotto di qualità. L'artigiano lavora su ordinazione, progettando e realizzando prodotti "su misura", personalizzati. Vengono acquisite importanti competenze nel trattamento di materiali particolari, come le pelli di coccodrillo e di lucertola. Grazie a queste radici Firenze e la Toscana oggi sono al primo posto nel mondo per la produzione di pelletteria di lusso e di qualità. Da quest'anno MLE intende innestare questo immenso patrimonio di conoscenza all'interno dei propri prodotti, inserendo la pelle come nuova finitura su prodotti storici e realizzando nuovi prodotti che ne esaltino il valore.

The first companies of the Tuscan district of leather were born in the second half of 1800. One of the pioneers was Guccio Gucci who, in the Twenties, decides to open a laboratory specialized in leather goods, luggage and saddlery, along with a shop in Florence. The operations remain purely on artisanal scale. All the stages of the production process are performed within the laboratories, providing a quality product. The craftsman works "on order", designing and manufacturing customized products. The skills start to grow, especially in the treatment of particular materials, such as crocodile hides and lizard. Thanks to these roots Florence and Tuscany are now in first place in the world for the production of luxury and high quality leather goods. From this year MLE introduces this immense wealth of knowledge in its products, entering the skin as a new finish on historical products and creating new products to enhance their value.

Les premières entreprises Toscane de cuir sont nées dans la seconde moitié de 1800. Un des pionniers était Guccio Gucci qui, dans les années 20', décide d'ouvrir un laboratoire spécialisé dans la maroquinerie, bagages et sellerie, avec un magasin dans Florence. Les opérations restent purement à l'échelle artisanale. Toutes les étapes du processus de production sont effectuées dans les laboratoires, en fournissant un produit de qualité. Les artisans travaillent sur commande, ils conçoivent et fabriquent des produits personnalisés. Les compétences se développent, en particulier dans le traitement des peaux de crocodile et de lézard. Grâce à ce savoir faire, Florence et la Toscane sont aujourd'hui les leaders au monde pour la production de la maroquinerie de luxe. Cette année, MLE a décidé d'intégrer ce patrimoine de connaissances dans la fabrication de ses propres produits, en intégrant des finitions en cuir dans certains de ses modèles historiques et également dans de nouvelles collections.

Si le produit a des pièces en cuir, d'ajouter le code de cuir (page 217)

PERSONALIZZAZIONE | CUSTOMIZING | PERSONNALISATION

### Legni e Metalli | Woods and Finishes | Bois et Finitions

Anche i legni e le finiture dei metalli sono oggetto di personalizzazione. Sono 5 essenze disponibili e 14 i trattamenti dei metalli, alcuni di essi frutto della ricerca e sviluppo MLE in questo specifico settore. Accanto alle finiture galvaniche più comuni come il cromo e l'oro, MLE offre finiture con lavorazioni a mano come l'argento e l'oro anticato. La finitura brunito, che ricorda il ferro battuto, è stata sviluppata attraverso un trattamento di verniciatura sviluppato all'interno dell'azienda. Grazie a questo trattamento è possibile ottenere questa finitura anche su materiali diversi dall'ottone. Con questo catalogo entrano a far parte della collezione due nuove finiture rame: il satinato e l'anticato.

Even the wood and metal finishes are subject to customization. Are available up to 5 types of wood and 14 treatments of metals. Some of them are the result of MLE R&D in this specific field. Besides the most common galvanic finishes such as chrome and gold finishes MLE offers handmade processes such as antique silver and antique gold. The burnished brass finish it's very near the wrought iron and has been achieved through a paint treatment developed within the company. With this treatment you can get this finish even on materials other than the brass. With this catalogue two new copper finishes become part of the collection: the brushed and the antique.

Le bois et le métal permettent aussi la personnalisation. 5 tonalités différentes de bois et 14 traitements de métaux. Certains d'entre eux sont le résultat de recherche et développement de MLE dans ce domaine très spécifique. Outre les finitions galvanisées les plus courantes le chrome et l'or, MLE offre des procédés artisanaux tel que le patine antiquaire argent et patine antiquaire or. La finition en laiton bruni, est très près du fer forgé et a été obtenu grâce à un traitement de peinture développé au sein de l'entreprise. Avec cette spécialisation, vous pouvez obtenir cette finition même sur des matériaux autres que le laiton. Avec ce catalogue devenue partie de la collection deux nouvelles finition cuivre: le brossé et l'antiquaire.

Si le produit a des pièces en bois, d'ajouter le code de bois (page 217)

## Tessuti | Fabrics | Tissus

La continua collaborazione con Interior Designer e l'interesse verso modelli esclusivi che diventino parte integrante della decorazione dell'hotel, ha spinto MLE a creare uno specifico atelier dedicato alla realizzazione di articoli "su misura". Qui la cura del dettaglio è spinta ai massimi livelli.

Oggi MLE si presenta ai suoi Clienti con circa 70 rivestimenti per paralumi: dal classico chinette, alla seta, all'organza, all'ecopelle ed a materiali innovativi in tantissimi colori diversi. Le forme dei paralumi sono oggi diventati una variabile tanto che alcune delle novità di questo catalogo sono state disegnate in modo da svincolare il disegno del paralume dalla sorgente luminosa. Se poi queste opzioni non bastassero, già da tempo MLE è organizzata per rivestire i paralumi con i tessuti scelti dal progettista.

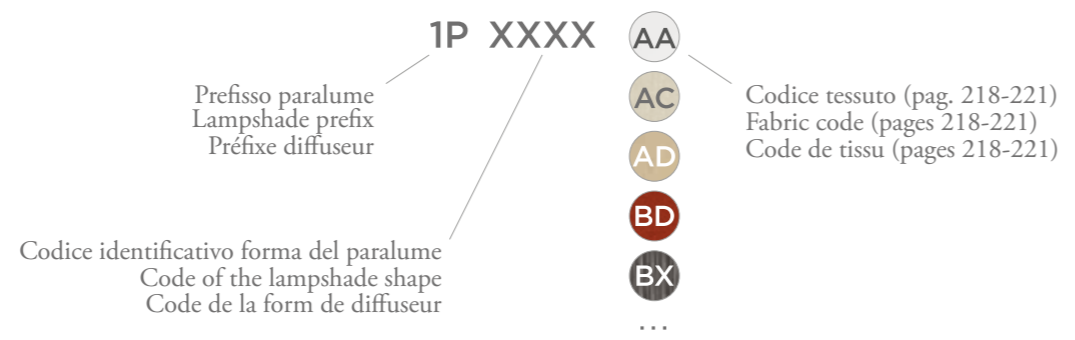

The continuous collaboration with interior designers and interest in exclusive designs that become an integral part of the decoration of the hotel, drove MLE to create a specific workshop dedicated to the creation of articles "made to measure". Here, the attention to detail is pushed to the highest levels.

Today MLE introduces its Clients 70 fabrics for lampshades from classic chinette, to silk, to organdie, to ecological and innovative materials in many different colors. The shapes of lampshades have today become a variable so that some of the novelties of this catalog have been conceived to release the design of the shade from the light source. And if these options are not enough, since some time MLE is organized to cover lampshades with fabrics chosen by the Designer.

La collaboration continue avec les Architectes d'intérieur et leurs intérêts dans des modèles exclusifs qui deviennent une partie intégrante de la décoration de l'hôtel, a conduit MLE à créer un atelier spécifique dédié à la création d'articles "sur mesure". Ici, le souci du détail est poussé au plus haut niveau.

Aujourd'hui MLE se présente à ses clients avec 70 tissus pour abat-jour de la Chinette classique, à la soie, à l'organdi, des matériaux écologiques et innovants dans de nombreuses couleurs. Les formes des abat-jour sont devenus une variante de sorte que certaines des nouveautés de ce catalogue ne sont conçus que pour libérer la conception du diffuseur de la source lumineuse. Et si ces options n'étaient pas suffisantes, depuis quelque temps MLE s'est organisé pour recouvrir les abat-jour avec des tissus choisis par le Concepteur.

Pongé ivory pleated hand-wrapped on the structure without trim.  
Pongée plissée ivoire bandés à main sur la structure sans garniture.

*Su misura | Custom made | Fait sur commande*

Quando è necessario MLE si spinge oltre il proprio catalogo e sviluppa nuovi prodotti su disegno del Progettista. Pezzi unici per le zone pubbliche o piccole serie per le camere, le suite o i corridoi. Dallo schizzo del Progettista, MLE ingegnerizza e sviluppa il prodotto inserendo le giuste sorgenti luminose e considerando le normative tecniche e di sicurezza del paese dove sarà effettuata l'installazione. MLE è quindi in grado di proporsi come unico fornitore per l'illuminazione interna dell'albergo garantendo la qualità, la puntualità e la stessa cura del dettaglio della sua gamma standard.

When it's needed, MLE goes beyond its catalog and develops new products according to customer design. Unique pieces for public areas or small series for the rooms, suites and corridors. Starting from the sketch of the Designer, MLE engineers and develops the product by including the correct light sources and considering the technical and safety regulations of the country where the installation will be carried out. MLE is then able to act as the sole supplier for the interior lighting of the hotel by ensuring the quality, timeliness and the same attention to detail of its standard range.

Lorsque cela est nécessaire, MLE va au-delà de son catalogue et développe de nouveaux produits selon la conception de l'Architecte. Des pièces uniques pour les espaces publics ou de petites séries pour les chambres, les suites et les couloirs. A partir du dessin du Designer, MLE développe le produit avec les bonnes sources et compte tenu du règlement technique et de sécurité du pays où l'installation sera effectuée. MLE est alors en mesure d'agir comme fournisseur exclusif pour l'éclairage intérieur de l'hôtel en assurant la qualité, la rapidité et la même attention aux détails que pour sa gamme standard.

**SALE DA BAGNO  
BATHROOM  
SALLE DE BAINS**

## Normative europee per l'illuminazione dei bagni | European regulations for bathroom lighting | Réglementation européenne pour l'illumination de la salle de bains

Caratteristiche tecniche degli apparecchi in base ai volumi.

Le normative Europee impongono che qualsiasi apparecchio elettrico installato ad una distanza inferiore a 60 cm dalla doccia o dalla vasca da bagno, sia certificato IP44 cioè resistente alla penetrazione dell'acqua, secondo le seguenti regole:

**Volume 1** – Nella zona doccia-vasca sono ammessi solo apparecchi Classe III con grado di protezione all'acqua non inferiore a IP44, alimentati con trasformatori TBTS\* 12V.

**Volume 2** – Sotto i 225 cm sono consentiti solo due tipi di apparecchi: apparecchi Classe II IP44 (protetti contro gli spruzzi d'acqua) protetti tramite disgiuntore differenziale <30 mA; apparecchi Classe III, alimentati con trasformatori TBTS\* 12V. All'interno del volume 2 è ammessa una presa di corrente alimentata da un trasformatore di separazione\*\* a bassa potenza (es. per la presa del rasoio).

**Volume 3** – Apparecchi in Classe II IP21 (protezione contro le gocce d'acqua in caduta verticale), protetti tramite disgiuntore differenziale <30 mA o tramite trasformatore di separazione \*\*. Apparecchi Classe III IP21 alimentati con trasformatori TBTS\* 12V.

\* Trasformatori a bassissima tensione di sicurezza conformi alla norma EN 60.742, da collocarsi obbligatoriamente all'esterno dei volumi 1 e 2.

\*\* Trasformatore con avvolgimenti elettronicamente separati tramite isolamento doppio o rinforzato e conforme alla norma EN 60.742.

Technical feature of light fittings according to the volume.

To comply with the European safety standards regarding the installation of electrical fittings within the bathroom, all the appliances installed at a distance of 60 cm or less from the bath or shower must be water-resistant IP 44 rated, as per here below rules:

**Volume 1** – Only lighting fittings with water protection levels not lower than IP44 are acceptable powered by TBTS 12V transformers\*.

**Volume 2** – Below 225 cm. only the two following kind of fittings are permitted: IP44 Class II fittings (water resistant) protected with current circuit breaker <30mA residual; IP44 Class III fittings powered by TBTS 12V transformers\*. An electrical socket complete with double isolated transformer is allowed i.e. electric shaver socket \*\*

**Volume 3** – Class II IP21 fittings (protected against vertical water drops), wired to current circuit breakers or separate transformers< 30 mA. Class III IP21 fittings (protected against vertical water drops) powered by TBTS 12V transformers.

\* To comply with regulations EN 60.742 standard transformers must be placed outside volume 1 and 2 within the bathroom.

\*\* The coils within this transformer are double isolated conforming with EN-60.742 norm.

Caracteristiques techniques des luminaires selon les volumes.

La norme européenne impose que les appareils électriques installés à une distance inférieure à 60 cm d'une baignoire ou d'une douche, soient résistants à la pénétration d'eau et donc certifiés IP 44, selon les normes:

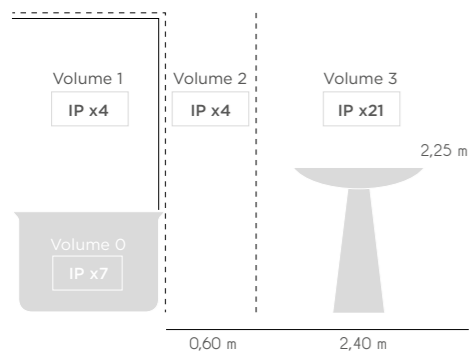

**Volume 1** – Seulement les luminaires Classe III IP 44 sont admis (protégés contre la pénétration des liquides) et alimentés en TBTS\* 12V.

**Volume 2** – Au-dessous de 225 cm. sont admis seulement les appareils suivants: luminaires de Classe II IP 44 (protégés contre la pénétration des liquides) protégés par un disjoncteur différentiel < à 30 mA. et luminaires de Classe III IP 44, alimentés en TBTS\* 12V. Dans le Volume 2, on admet une prise de courant alimentée par un transformateur\*\* d'isolement de faible puissance (exemple: prise rasoir).

**Volume 3** – Luminaires de Classe II IP21, protégés contre les chutes verticales de gouttes d'eau et protégés par un disjoncteur différentiel < à 3 mA ou alimentés par un transformateur\*\* d'isolement. Luminaires de Classe III IP21 (protégés contre les chutes verticales de gouttes d'eau) et alimentés en TBTS\*12V.

\* TBTS: Très Basse Tension de Sécurité, transformateur conforme à la norme NF-EN 60.742 obligatoire et situé en dehors des volumes 0,1 et 2.

\*\* Transformateur dont les enroulements sont électriquement séparés par une double isolation conforme à la norme EN 60.742.

## Specchiere a filo muro (FM)

Per venire incontro alle necessità degli interior designers abbiamo sviluppato questo nuovo concetto di specchiera luminosa già sperimentato in alcuni importanti progetti. Le caratteristiche principali di queste specchiere sono:

- lo spessore ridotto coniugato con un comfort visivo ottimale,
- l'assenza di cornici di finitura a vista,
- la facilità d'installazione e manutenzione,
- l'illuminamento uniforme delle aree satiniate,
- la protezione dall'acqua e dall'umidità.

Per l'installazione è sufficiente predisporre un vano delle dimensioni dello specchio e di profondità 26mm. Lo specchio è sostenuto da un adeguato numero di magneti e viene movimentato con le ventose. L'alimentazione è remota e può essere alloggiata in un vano a muro, in un mobile o nel controsoffitto fino a una distanza massima di 5 metri.

Anche su questi specchi è possibile installare il sistema anti-appannamento. Questa tecnologia è già disponibile su alcuni nostri modelli ma può essere estesa a tutti e realizzata 'su misura'.

## Mirrors flush with the wall (FM)

To meet the needs of interior designers, we have developed this new concept of lighting mirror already experienced in some important projects. The main features of these mirrors are:

- the reduced thickness conjugated optimum visual comfort,
- the absence of finishing frames at sight,
- easy installation and maintenance,
- the uniform illumination of the satin areas,
- the protection from water and humidity.

To install the flush mirror is sufficient to prepare a space the size of the mirror with depth 26mm. The mirror is supported by an appropriate number of magnets and is moved with the suction cups. The power supply is remote and can be housed in a wall box, in a cabinet or in the false ceiling up to a maximum distance of 5 meters. Also on these mirrors you can install the anti-mist system.

This technology is available already on some models but can be applied to all of them and also 'custom made'.

## Miroir encastré (FM)

Pour répondre aux besoins des designers et architectes d'intérieur, nous avons développé ce nouveau concept de miroirs éclairants déjà utilisé dans certains projets importants. Les principales caractéristiques de ces miroirs sont:

- L'épaisseur réduite ainsi qu'un confort visuel optimal,
- L'absence de cadres de finition,
- L'intégration et un entretien facile,
- L'éclairage uniforme des parties dépolies (lumineuses),
- La protection contre l'eau et l'humidité (IP).

Pour installer ce miroir encastré, il suffit d'une niche de la taille du miroir et une profondeur de 26mm. Il est maintenu par un nombre approprié d'aimants et se place grâce à des ventouses sur son boîtier. L'alimentation électrique fournie est déportée et peut être placée dans une armoire ou dans le faux plafond jusqu'à une distance maximale de 5 mètres. Vous pouvez également installer un système anti-buée en option.

Cette technologie est déjà disponible sur certains modèles et peut aussi bien s'adapter à nos autres miroirs qu'avec une solution 'sur mesure'.

Appliques et plafonniers sont:

- En classe F
- Avec la résistance au fil incandescent à 650°C (min)

Lampes de table et de sol sont équipées de:

- Schuko
- Interrupteur On/Off

Circuits LED utilisés sur les produits ont température de couleur blanche chaude.

Produits avec E27 et E14 douille de lampe sont également disponibles pour le marché américain avec certification UL.

MLE non si ritiene responsabile di eventuali danni causati dalla cattiva installazione degli apparecchi, dall'uso di lampadine diverse da quelle indicate, o dalla modifica apportate a un modello standard.

MLE si riserva il diritto di modificare le caratteristiche funzionali o dimensionali dei propri prodotti, o di eliminarli dalla collezione, senza preavviso.

La riproduzione anche se parziale di questo catalogo è assolutamente proibita. MLE procederà a tutte le azioni legali contro qualsiasi imitazione.

Forme e colori degli articoli illustrati sono riprodotti più fedelmente possibile: MLE non si ritiene responsabile di errori di valutazione legate alle caratteristiche delle immagini.

Le misure nel catalogo sono espresse in cm.

MLE is not liable for any injuries or damages due to incorrect installation of its fixtures or the use of lamps other than those indicated in the catalogue or any modification made to the fitting by an other.

MLE reserves the right to modify its production without prior notice.

The reproduction or copying of this catalogue is strictly prohibited. MLE will take all legal action with respect to any imitators.

MLE cannot be held legally responsible for any inconstances that might appear within the catalogue.

Measurements are expressed in cm.

MLE n'est pas responsable des éventuels dommages causés par une mauvaise installation de ses appareils, l'utilisation d'ampoules différentes de celles spécifiées ou de la modification d'un de ses produits standard.

MLE se réserve le droit de modifier ou de supprimer en partie ou en totalité sans préavis les caractéristiques fonctionnelles ou dimensionnelles des produits de sa gamme.

La reproduction ou la photocopie de ce catalogue est interdite. MLE procédera à toutes actions légales vis à vis d'éventuels imitateurs.

MLE ne peut pas être tenue pour responsable juridiquement des erreurs d'impression du catalogue.

Les mesures sont exprimées en cm.
