STUDIO JEAN-PHILIPPE NUEL

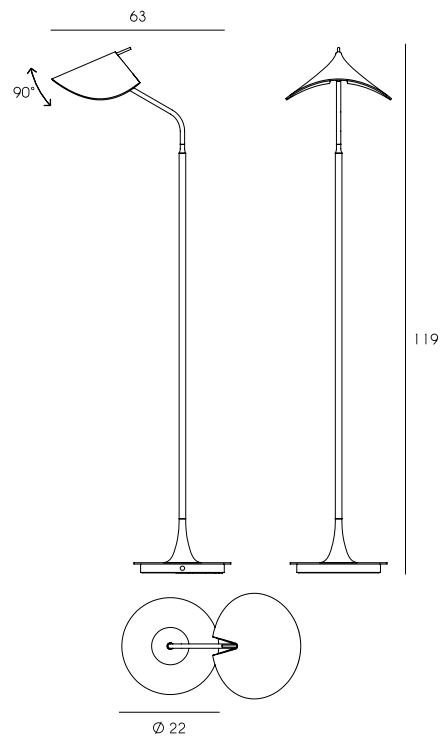

# ABAC: THE FAMILY GROWS!

The signature of the Abac range lies in the circular, flexible and mobile shape of its shade which evokes the movement of a drapery. For this table lamp, the Studio Jean-Philippe Nuel has developed its concept by placing the lampshade at the top of a base that appears to be delicately stretched from the base to the light source. The spheric joint that supports the bicolor lampshade makes it possible both to orient the light source and to modulate the light intensity. This new configuration gives it a slender and long silhouette of elegant simplicity.
